## Prepositional Verbs List With Examples.

**The verb** is a word that shows actions, conditions, state of being, and possessions. Indeed, prepositions are the words that are used before the noun to show the relation between **noun** and **pronoun**. So what about **prepositional** verbs? They are the group of words that contain verb + prepositions. Like laughing at, looking at. In this article, we study the **Prepositional Verbs List With Examples in detail**.

So **prepositional verbs** are considered as an expression that is the combination of verbs & prepositions. They are not separable mostly in addition. The group of words requires an

object subsequently. Because these verbs are transitive. So verb + preposition produces another verb that gives a similar meaning to its original verb meanings.

These kinds of **verbs** are valid and advanced while making our speeches and conversations strong and fluent. It would be better to learn their correct usage and meanings properly. So for better understanding learn the prepositional verbs that are listed down with examples.
